

BioFoundry® Software Development Kit (SDK) selected by Green Bit S.p.A. for their DactyScan 84 Live Fingerprint Scanner.

Somerset, N.J. July 19, 2007 – BioFoundry®, a division of OSS Nokalva, Inc., announced today that Green Bit S.p.A. has selected the BioFoundry® Software Development Kit (SDK) to create an international standard-based offering for their DactyScan 84 Live Fingerprint Scanner.

DactyScan 84 is suitable for all applications that require high quality acquisition of 10 fingerprints, including rolled fingerprints. “The use of the BioFoundry® SDK has facilitated the development of a BioAPI 2.0 Biometric Service Provider (BSP) for DactyScan84. It has helped us significantly reduce development time, resulting in reduced cost and shorter time to market with a standard-based offering,” noted Ing. Adriano De Luca, Chief Executive Officer of Green Bit S.p.A.

The BioFoundry® SDK is a full implementation of the International Standard, ISO/IEC 19784-1 BioAPI 2.0. It includes an implementation of the BioAPI 2.0 framework, which isolates applications from specific biometric technologies; a BSP Template that eases the development of BioAPI-compliant BSPs; as well as samples and user documentation. The BioFoundry® SDK helps create biometric architectures in which different biometric software components can be interoperable. The BioFoundry® SDK benefits both the developers of BioAPI 2.0 applications and the developers of BioAPI 2.0 BSPs.

“We are very happy with Green Bit’s decision to use the BioFoundry® SDK to create a standard-compliant BSP for their 10-Print scanner, DactyScan 84. Use of the BioFoundry® SDK by Green Bit clearly demonstrates its value and ease of use in creating BSPs to meet market requirements for interoperability,” commented Bharat Shah, Deputy Director of Biometrics at OSS Nokalva.

The BioFoundry® SDK is available for a free 30-day trial download at <http://www.biofoundry.com/products/biofoundryFreeTrial.html>.

#### About BioFoundry®

BioFoundry®, a division of OSS Nokalva, Inc., provides standards-based biometric solutions and professional services, and is a leading contributor to biometric standards development at both the national and the international level. Since 1988, OSS Nokalva has been instrumental in shaping and developing both standards and technologies. [www.biofoundry.com](http://www.biofoundry.com)

#### About Green Bit S.p.A.

Green Bit S.p.A. is a leader in the development and realization of high quality optical dactyloscopic systems for high-security applications through fingerprint acquisition and recognition. Its products, fully certified according to the IAFIS-IQS standard, can be used in various environments: from the applications of public security (Law Enforcement) to citizen enrollment for e-Documents (ID Management).
